Level of assurance and materiality

- Level of assurance : Limited assurance
- Materiality threshold: $\pm 5\%$ for the total sum

This verification is considered materially misleading if the value of the error more than 5% of the total inventory for the subject matter of the verification.

Methodology

This verification is conducted in accordance with the verification procedures of Intertek Testing Services Korea Ltd. The following activities were conducted as part of evidence collection.

- Agreement on verification level, objectives, criteria, organizational scope and materiality level;
- Review processes and procedures to establish organizational boundaries to ensure relevance of emissions reporting across direct and indirect sources;
- Ensure that secondary data is referenced from reliable or credible sources;
- Review of adequacy and suitability of greenhouse gas calculation procedures, including calorific value and emission coefficient, etc. applied to activity data and emission calculations;
- Interviews with employees of the target company or subsidiary within the scope of verification;
- Review data and information systems and methodologies for the collection, aggregation, analysis, and review of information used to determine greenhouse gas emissions;
- Random sample testing of evidence and data values to determine greenhouse gas emissions;
- Strategic analysis and risk assessment based on submitted Greenhouse Gas Report.

Limitations of Verification

This verification has inherent limitations that may arise in the process of applying the verification standards and methods to the emissions data shown in the DONGJIN ENGINEERING CO., LTD. Greenhouse Gas Report, and there may be errors, omissions, or false entries that are not found.

Qualification and Independence
